

**Position Announcement**  
**COLLIER MOSQUITO CONTROL DISTRICT**  
**Aircraft Mechanic II**

**Primary Duties:**

Complete routine inspections and servicing of both fixed wing and rotor wing aircraft including pesticide application systems. Perform troubleshooting and repair of aircraft systems including aircraft pesticide application systems. Design, fabricate, install, and test pesticide application systems.

**Education/Experience/Training:**

High School diploma or GED and current FAA A&P certificate required. Minimum five years of experience maintaining turbine powered aircraft: emphasis on Shorts SC7, DHC6 Twin Otter, MD500D, Bell 407 GXi, Honeywell TPE331, PT6A-34, RR250 series. Valid Class "E" Florida Driver's License, with clean driving record. Must provide basic set of hand tools. Must be available to work as mechanic on duty for night and weekend application missions. Must be willing to attend factory training courses that may require up to three weeks away from home.

**Knowledge/Skills Required:**

Must be capable of utilizing computer based technical data. Must be able to read, write and speak English. Occasional lifting of more than 50 lbs. may be required. May be required to fly in District aircraft, including test flights. May be involved in the loading of pesticide and in the calibration of various application systems. May be required to perform non-routine maintenance and repairs at off-site locations. Successful candidate must be certified in Public Health Pest Control within six months.

**Compensation**

Non-exempt salary negotiable based on experience. Generous benefits package includes Florida Retirement System, health, and life insurance. Paid vacation and sick time.
